

I am a Flight Attendant (F/A) Employed by US Airways. My Employee Number is 49277. I oppose the proposal to relax cellular telephone usage in flight. I feel it would hinder F/A's ability to maintain order under normal operations. It would make it virtually impossible to control passengers in an event of an emergency. Most airlines have onboard communications that can be used in flight that do not interfere with flight crew and can be disabled if necessary.
